

Barber Battle Stream Rules

When: 29.5. 2021

Start: 11.00 competitors

On-line Live stream: 11.30 am

Foreword and justification

This competition is created on the basis of today's times and government regulations that do not allow us to compete and support this field. Therefore, an online barber contest is the only way and means to promote this craft, to promote the psychological side of barbers / hairdressers who have been without their favorite job and job for a year.

Introduction

Barber Battle Stream is a competition that takes place online streaming with the participation of a jury, contestant, commentator and registered audience, who can watch the entire live broadcast for free on the website www.barberbattle.cz

The competition is divided into three categories, namely the women's Ladies Barber category, the men's men's Barber category and the Fast fade category, which is common to men and women and consists of the speed of the fade.

This competition is limited by age from 15+. The registration fee includes an e-mail ticket, which the competitor will prove at the beginning of the live entry and a link to the online gateway, which will be valid only on the day of the competition.

Instructions for successful Live transmission

By registering for the competition, you agree to ensure and follow the subsequent instructions.

1. Space, equipment, barber tools and use of products

The place where the contestant will cut his model, which is in the shot of your mobile phone or webcam, will be tidy. The space will include a chair, a barber chair for the model, a storage table for work items and a mirror, if necessary for your work. We recommend competing where you are used to cutting.

All equipment must be provided by the competitor himself and must be ready before the start of the competition. The power tool he / she will use for his / her hair creation must be ready in place and, if necessary, connected to the mains. (During the competition, it is forbidden to leave the camera for any purpose, ie also due to the connection of tools to the electrical network.)

Competitors will secure their own hair cosmetics of any brand. Any equipment, tools and products are not permitted with anyone outside the model during the competition. Color sprays, foam stylings, coloring sprays and Topik-style powders are prohibited for all competition categories.

Competitors must have their own:

- machines
- scissors
- hair dryer
- razors
- combs / brushes
- raincoat

- styling products

2. Camera equipment and wifi signal quality

In order to ensure continuous high-quality data transfer to the jury and the viewer, it is necessary to ensure a fast Internet signal with a minimum recording speed limit of 50 g and a camera device charged or connected to the mains. The camera device may be in the form of a mobile phone or GOpro, a webcam, but the camera device must have a minimum lens resolution of 1280 x 720 pixels.

If the competitor does not ensure quality image transmission or the image is unstable, he is disqualified from the competition. A small tolerance of weather conditions or a bad signal from the Internet provider is taken into account.

Competitors must record and broadcast video and audio tracks. It is not a condition and a necessity to have any external microphones or remote transmitters. Communication with the contestant will take place during the initial transfer test and during the creation of the hairstyle the jury or commentator may ask questions and questions about the work and creation of the contestant's hairstyle. During the competition, the contestant will be recorded and broadcast to the jury and the viewer, especially only the image, which will be supplemented by our music track, which meets the copyright on the broadcasting of audio media in accordance with the law paragraph-13. paragraph-2.

The receiving and transmitting audio track equipment must be switched on by the competitor throughout the competition. The sound in the room from another transmitter, such as a radio or another audio player, must not be extremely loud so as not to become such a distraction in the event of a question from the commentator and the jury during the competition.

Internet signal test

Before starting the live broadcast, the competitor should test the strength of the Internet signal in order to meet the limit for successful live transmission.

Signal strength test procedure:

Enter one of the links below into the Internet search engine and after opening, press START TEST, START MEASUREMENT.

3. Installation of camera equipment

Assembly and installation of a camera device, mobile phone or GOpro, the webcam will be performed by the competitor before the start of his competition category.

The camera device will preferably be attached to a tripod, stand or other product holding the camera in the direction and angle of view of the camera specified by us.

The stand with the camera will be placed in front of a chair or barber's chair in such a range that the image captures half of the model's body from the chest towards the head and at the same time captures the competitor

in a half figure from the waist to the head. The camera must transmit an image throughout the competition that will not be overshadowed by your back or the body of another person.

The camera image must be the same from the beginning of the test and the camera must not be placed in a place where the camera equipment may fall or vibrate. We recommend competitors if they cut or modify the model from the front when styling, to obtain a barber or hairdresser chair for handling and 360-degree rotation of the chair, thus avoiding

shadowing of the transmitted image from the camera equipment and thus avoid possible disqualification.

The camera stand or tripod must be placed in place so that it does not bind the competitor during its creation. The distance from the armrest should be about 2m, depending on the quality of the lens of the camera equipment. For easier and correct installation of the camera equipment, we have clearly shown you the procedure, range and the resulting transmission image below in the photos.

4. Final camera manipulation

Competitors postpone all work tools and hair cosmetics after completing their hairstyle and at the same time expiring. The model should be clean after the time limit without cut hair on the body and face and also stripped of the haircut. The competitor will be signaled by an audible siren 10 seconds before the end of the timeout. It is the competitor's duty to leave all activities with the model after the sound siren and to prepare for the final presentation of his hairstyle.

The final presentation will take place only after the commentator's call, there may be a time delay

due to the number of competitors. By inviting the commentator for the final presentation of his hairstyle, the contestant prepares his camera equipment so that the camera can be manipulated. So he removes the camera from the stand or tripod and prepares to bypass it from a closer angle of your model. When invited by a commentator, the contestant will go around his model by 360 degrees in a slow step, from a closer to detailed point of view. It is possible that the competitor will repeat this step in order to get the correct evaluation of the births. Contestants may also be asked by a jury or commentator to approach a point or hairline of your hairstyle. Upon completion, the contestant will take a picture of his model on his mobile phone or camera from the angles shown below and send the captured photo documentation to the e-mail below or insert a link that will be functional on the day of the competition.

Rules of competition categories

Barber Battle Stream is a competition in three categories, which are limited by the number of registered competitors and the time of the competition category.

Ladies Barber 45 min - competition category for women only.

Men Barber 45 min - competition category for men only.
